### Research Summary

A waterjet machine, also known as a waterjet cutter or waterjet system, is a type of industrial machinery used for precision cutting of various materials. It operates by ejecting a high-pressure stream of water, often mixed with abrasive particles, onto the surface of the material being cut. This process can cleanly and accurately slice through materials such as metal, stone, glass, plastics, composites, and more, without generating heat-affected zones or causing thermal distortion. Waterjet machines offer exceptional versatility, allowing for the creation of intricate shapes, curves, and patterns with tight tolerances. They find applications across numerous industries, including aerospace, automotive, architecture, manufacturing, and art, due to their ability to produce high-quality cuts efficiently and effectively.

The major global manufacturers of Waterjet Machine include Omax, Bystronic, KMT, Water Jet Sweden, ESAB, Flow, Resato, Waterjet Corporation, Huffman, Dardi, Yongda Dynamo Electirc, Shenyang APW, Sino Achieve, Shenyang Head, etc. The global players competition landscape in this report is divided into three tiers.
