### Research Summary

A weather strip, also known as weather sealing or weatherstripping, is a flexible material used to seal gaps and openings around windows, doors, and other openings in buildings and vehicles to prevent air and water infiltration. Weather strips are typically made from materials such as rubber, foam, vinyl, or silicone, and they come in various shapes and sizes to fit different applications. They are installed along the edges of doors and windows to create a tight seal when closed, preventing drafts, moisture, dust, insects, and noise from entering the interior space. Weather stripping helps improve energy efficiency by reducing air leakage and heat loss, thereby lowering heating and cooling costs. It also enhances comfort by maintaining consistent indoor temperatures and reducing exterior noise. Additionally, weather strips can help prolong the lifespan of doors and windows by protecting them from moisture and air infiltration, thus preventing damage and deterioration.

The major global manufacturers of Weather Strip include Cooper Standard, Toyoda Gosei, Hutchinson, Nishikawa Rubber, SaarGummi Group, Hwaseung, Henniges Automotive, Jianxin Zhao's Group, Standard Profil, Kinugawa Rubber Industrial,
