Research Summary

Welding consumables refer to a broad category of materials essential for various welding processes, including arc welding, MIG (Metal Inert Gas) welding, TIG (Tungsten Inert Gas) welding, and others. These consumables play vital roles in the welding operation, facilitating the joining of metal components. Common welding consumables include electrodes, filler metals (such as welding wire or rods), fluxes, and shielding gases. Electrodes conduct electricity to create the arc necessary for welding, while filler metals are melted to form a bond between the base metals being joined. Fluxes are used to shield the weld pool from atmospheric contamination and to facilitate the removal of impurities. Shielding gases, such as argon, helium, or a mixture of gases, protect the weld area from oxidation and improve weld quality. The selection of welding consumables depends on factors such as the welding process, the type of base metals being joined, the required weld characteristics, and the environmental conditions of the welding operation. Choosing the appropriate consumables is crucial for achieving high-quality welds with strong mechanical properties and good corrosion resistance.

The major global manufacturers of Welding Consumables include Lincoln Electric, Colfax, Golden Bridge, Tianjin Bridge, Voestalpine, ITW, Kobelco, Weld Atlantic, Zhujiang Xiangjiang Welding, Shandong Solid Solider, HIT(Huatong), Jinglei Welding, Shandong Juli Welding, Gedik Welding, Wuhan Temo Welding, Kaynak, etc. The global players competition landscape in this report is divided into three tiers.
