Research Summary

White fused alumina is a high-quality abrasive material produced by melting high-purity aluminum oxide in an electric arc furnace, then cooling it down and crushing it into grains. It is characterized by its bright white color and high hardness, making it suitable for a wide range of abrasive applications. White fused alumina is commonly used in abrasive blasting, grinding, polishing, and cutting applications across various industries, including aerospace, automotive, electronics, and metalworking. It offers superior cutting performance, minimal surface contamination, and excellent thermal properties, making it particularly useful for precision machining and surface finishing tasks where high-quality results are required. Additionally, white fused alumina is also used as a refractory material in the production of ceramics, glass, and steel, thanks to its high temperature resistance and chemical stability.

The major global manufacturers of White Fused Alumina include Rusal, Alteo, Imerys, Washington Mills, Motim, LKAB, CUMI Minerals, Ruishi Renewable Resources Group, Shandong Luxintai, Jining Carbon Group, Bedrock, Zhengzhou Baigangyu, etc. The
