### Research Summary

A wine glass is a type of glassware specifically designed for serving and enjoying wine. Wine glasses typically have a stem, a bowl, and a rim. The stem allows the drinker to hold the glass without warming the wine with their hand, preserving its temperature. The bowl of the wine glass is shaped to enhance the wine-drinking experience, with variations in shape and size depending on the type of wine being served. For example, red wine glasses typically have a larger bowl with a wider opening to allow for greater aeration and better appreciation of the wine's aromas, while white wine glasses typically have a smaller bowl with a narrower opening to preserve the wine's delicate flavors and aromas. Additionally, there are specialized glasses for specific types of wine, such as champagne flutes for sparkling wine or port glasses for fortified wine. Overall, wine glasses play a crucial role in enhancing the sensory experience of drinking wine by highlighting its flavors, aromas, and appearance.
