Research Summary

Winter tires, also known as snow tires, are specially designed tires engineered to provide enhanced traction and performance in cold, snowy, and icy conditions. These tires feature unique tread patterns with deeper grooves and sipes (small slits) that bite into snow and ice, improving grip and handling on slippery roads. Additionally, winter tires are made from rubber compounds formulated to remain flexible in cold temperatures, ensuring better contact with the road surface. This flexibility enhances braking, acceleration, and cornering capabilities compared to all-season or summer tires in winter conditions. Winter tires are essential for ensuring safer driving and better control during harsh winter weather, reducing the risk of accidents and improving overall road safety.

The major global manufacturers of Winter Tire include Bridgestone, Michelin, Continental, Goodyear, Nokian Tyres, Hankook, Nizhnekamskshina, Pirelli, Yokohama, Toyo Tire, Kumho Tire, JSC Cordiant, Zhongce, GITI Tire, Triangle, Apollo, Cheng Shin, Nexen Tire, etc. The global players competition landscape in this report is divided into three tiers.
