Research Summary

Worsted yarn is a type of yarn that is spun from long-staple fibers of wool or other fibers like cotton, cashmere, or silk. The term 'worsted' refers to the way the fibers are processed during spinning. Worsted yarns are made by aligning and combing the fibers parallel to each other before spinning, resulting in a smooth and strong yarn with minimal fuzziness or fiber ends sticking out. This process helps create a dense, tightly twisted yarn that is durable and has excellent stitch definition when knitted or woven. Worsted yarns are often used in making high-quality clothing such as suits, sweaters, and outerwear, as well as in weaving fabrics for upholstery and home furnishings. They are prized for their smooth texture, fine appearance, and ability to hold shape well in finished products. Worsted yarns are available in various weights and fiber compositions to suit different crafting and textile needs.

The major global manufacturers of Worsted Yarn include Red Heart, Lion Brand, Yarnspirations, Premier, Darn Good Yarn, Sullivans USA, Lorna's Laces, Brown Sheep Co, Ancient Arts, Patons, Cascade, Debbie Bliss, Hengyuanxiang Group, Sanli, Qlfa Merino Woolen Yarn, Malabrigo, Ravelly, etc. The global players competition landscape
