Research Summary

Zinc borate is an inorganic compound with the chemical formula ZnB_2O_4 . It is a white, crystalline powder that is commonly used as a flame retardant and smoke suppressant in various industries. Zinc borate is particularly effective in plastics, rubber, textiles, and wood products to improve fire safety by reducing the flammability of materials and inhibiting the generation of smoke and toxic gases during combustion. It works by releasing water vapor and creating a protective char layer on the surface of the material, which acts as a barrier to the spread of fire. Zinc borate is also used as a fungicide and corrosion inhibitor in certain applications due to its ability to inhibit fungal growth and protect against metal corrosion. Additionally, it finds use as a filler and opacifier in ceramic glazes and coatings. Overall, zinc borate plays a crucial role in enhancing safety and performance characteristics in various products across different industries.

The major global manufacturers of Zinc Borate include Borax, Royce, Akdeniz Chemson, Eti Maden, Societa Chimica Larderello, Wallace FR, Wuwei Industrial, Chuanjun, Shandong Bio, Enter Chemical, etc. The global players competition landscape in this report is divided into three tiers.
