## Abstracts

### Hip Replacement Implants Market: Overview

The global market overview for hip replacement implants looks promising considering advances in computer-assisted total hip replacement as well as the other technological platforms. The hip replacement implants market will continue to grow due to an aging population in much of the world. Increasing life spans and lifestyles impact the number of individuals with joints subject to failure, thereby increasing demand for hip replacement procedures. Additionally, the growing health awareness among masses, along with increase in the spending capacity of the population are propelling the market growth.

Global hip replacement implants market is projected to reach more than US\$ 5 Billion by 2021, at a CAGR of XX% from 2016 to 2021.

### Hip Replacement Implants Market: Country-wise Outlook

United States holds the highest share with more than 50% in 2015, and is expected that United States will maintain its position in the forecasting period. Japan and China hold the 2nd, and 3rd position in the hip replacement implants market. However, some of the European countries hip replacement implants market dwindle due to the EU austerity measures and the cutbacks in reimbursement have led to a decline over the past few years, while procedure numbers have still continued to grow in a modest way.
