Abstracts

India's outbound tourism market size is expected to reach \$60 billion by 2031, growing at a CAGR of 10.9% over the forecast period 2023-2031.

Rising personal income levels and greater accessibility will enable international travel for a greater proportion of India's population. India's sizable global diasporas and international student body will continue to be a pull factor for visiting friends and relatives. In addition, affluent Indian travelers will seek first-class, personalized experiences that exude cachet. Business travel will expand in line with commercial interests, with the meetings, incentives, conferences and exhibitions segment (MICE) offering the greatest prospects. The next generation of Indian travelers will be younger, more gender-specific, and less likely to travel in multigenerational family groups. By 2031, an estimated 50 million Indians will travel overseas.
