Abstracts

United States Insulin Pen Market is expected to reach more than US\$2.5 Billion by 2022.

Market growth can be attributed to factors such as diabetes patient population, user-friendly design, help avoid over/under-dosing of insulin, rising market demand for human insulin analogs and technological advancements in the field of insulin pen devices. However, low patient awareness, lack of device education and training among physicians and perception of the higher cost is expected to hamper growth of the market during forecast period.
