Abstracts

Some trivial and yet complex questions associate with open access mechanism which needs to be addressed through a pan India study which should prove to be a path finding guide for the project developers as well buyers to facilitate the same. The pinnacle interest for the developers is to learn about as to why only renewable players are reaping benefits of direct power purchase agreements and why not the thermal power producers under independent and captive category enjoy the same? Queries like these and many more demanded an in-depth research to unearth the very reason as to why essentially open access is fast gaining popularity in India, which transformed into the research base for the report for Enincon Consulting LLP.
