Abstracts

Sun care continued to slow down in 2014 as Western Europe declined while North America remained stagnant. The addition of sun protection benefits to skin care and colour cosmetics products has been key to this. However, further penetration into new markets will help sun care sales to reach US\$11.3 billion in 2019. In terms of top markets Brazil and China still lead growth but the Middle East and Africa and Southern Europe remain key for sun protection players.
