Abstracts

According to the Social Characterization Survey (CASEN) the elderly accounted for 17% of the population in 2013, which positioned Chile as a country “in the process of advanced ageing”, under the United Nations characterisation. It is estimated that between 10% and 34% of this increasing elderly population have incontinence issues, with it being more common in women.

Euromonitor International's Adult Incontinence in Chile report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data 2012-2016, allowing you to identify the sectors driving growth.
