Abstracts

The number of passengers transported by airlines grew significantly in 2022, and has continued to grow in 2023, although to a much lesser degree. It has not yet reached the level seen before the COVID-19 crisis, although it is estimated that, in terms of value, it will have done so due to the significant increase in the price of air tickets driven by the sharp increase in the price of fuel resulting from the Russian invasion of Ukraine and the ensuing conflict.

Euromonitor International's Airlines in Peru report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest market size data 2018-2022, allowing you to identify the sectors driving growth. It identifies the leading companies and offers strategic analysis of key factors influencing the market - be they new legislative, technology or pricing issues. Background information on disposable income, annual leave and holiday taking habits is also included. Forecasts to 2027 illustrate how the market is set to change.

Product coverage: Airlines Offline, Airlines Online, Ancillary Revenue, Domestic Airlines, International Airlines, Non-Scheduled Carriers, Passenger Revenue, Scheduled Airlines.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
