Abstracts

Between 2021-2040, population growth in Algeria will be driven solely by positive natural change, as births continue to outweigh deaths. Net migration will remain negative, and brain drain will continue to challenge the country. Rising living standards will support the ageing trend, with an increase in 65+ citizens impacting the consumer landscape. The urban population will expand, with urbanisation remaining above the regional average, aiding Algeria's appeal as a consumer market in 2040.

Euromonitor's Algeria in 2040: The Future Demographic report analyses factors influencing national consumer expenditure. Consumer lifestyles reports include coverage of: population, urban development, home ownership, household profiles, labour, income, consumer and family expenditure, health, education, eating habits, drinking habits, shopping habits, personal grooming, clothing, leisure habits, savings and investments, media, communication, transport and travel and tourism. Use this report to understand the factors influencing a nation's lifestyle choices.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Consumer Lifestyles market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;

Use five-year forecasts to assess how the market is predicted to develop.
