Abstracts

Overall, apparel and footwear continued to witness positive current value growth in 2023, although as in the previous year much of this growth was driven by inflation and retail price increases. In the face of these higher prices and costs of living, Danish consumers have continued to reduce demand for apparel and footwear, as part of a broader trend to limit shopping expenses and save money. Nonetheless, many Danish apparel and footwear brands experienced significant growth in exports, so while...

Euromonitor International's Apparel and Footwear in Denmark report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data 2018-2022 and analysis by distribution format allowing you to identify the sectors driving growth.
