Abstracts

The start of 2021 saw local consumers leverage further cash availability rarely observed in the country, due to two withdrawals of pension funds authorised at the end of 2020. This large amount of circulating money and the reopening of large parts of the country after prolonged quarantines, meant that many Chileans took the opportunity to invest their money in categories such as apparel and footwear, as they prepared for the summer season and increased socialising as restrictions relaxed.

Euromonitor International's Apparel and Footwear Specialist Retailers in Chile report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
