Abstracts

The apparel category has grown modestly over the review period. The slowdown may be attributed to the inflation growth in Bulgaria in recent years and the recession in the period 2009-2011, both of which caused a significant part of the population to lower their expenditure on many goods, including apparel.

Euromonitor International's Apparel Specialist Retailers in Bulgaria report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
