## Abstracts

Along with positive economic growth, Indonesia saw an increasing middle class population in 2012, following citizens' rising disposable income levels. This optimistic economic climate enticed retailers to establish more mid-range to high-end stores, located in prestigious shopping malls in Jakarta and some other major cities in Indonesia. As those premium products commanded higher prices, the value sales of apparel specialist retailers also increased.

Euromonitor International's Apparel Specialist Retailers in Indonesia report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.

### Why buy this report?

Get a detailed picture of the Apparel Specialist Retailers market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;

Use five-year forecasts to assess how the market is predicted to develop.
