## Abstracts

Trading conditions remained difficult in 2012 as consumers, fearful of the economic climate, continued to limit spending. Worries regarding the possibility of significant tax increases, in particular household and water charges, affected sentiment. Retailers meanwhile faced ongoing issues in relation to excessive rents and rates combined with high labour rates while attempting to mitigate losses due to falling revenues.

Euromonitor International's Apparel Specialist Retailers in Ireland report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.
