Abstracts

In 2012, apparel specialist retailers continued to feel the aftermath of the economic recession and low consumer confidence. As a result, many consumers chose not to spend money on discretionary items such as clothing and footwear or shopped around for the best bargains, notably via online platforms.

Euromonitor International's Apparel Specialist Retailers in Switzerland report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
