ID: BF7DF61F9E7EN

## Abstracts

Flexible plastic and folding cartons remained popular packaging types for dried baby food in South Africa (the second largest category in baby food packaging), as they are considered more lightweight and easy to transport, making them convenient for parents on the go. These pack types also offer excellent barrier properties, ensuring that the dried baby food remains fresh and free from moisture, light, and air, which can degrade the quality and nutritional value of the product. Their compact and...

Euromonitor International's Baby Food Packaging in South Africa report offers insight into key trends and developments driving packaging across the category. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.

Product coverage: Dried Baby Food, Milk Formula, Other Baby Food, Prepared Baby Food.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
