Abstracts

Despite already having returned to the pre-pandemic level of current value sales in 2021, beauty and personal care saw continued value growth in 2022. Although seeing a minimal increase, volume sales also returned to the pre-pandemic level in 2022. These positive performances were driven by the release of pent-up consumer demand and the increase in activities outside of the home as the COVID-19 pandemic eased.

Euromonitor International's Beauty and Personal Care in South Korea report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data 2018-2022, allowing you to identify the sectors driving growth. Forecasts to 2027 illustrate how the market is set to change.
