Abstracts

Depopulation in Belarus from 2021-2040 will result from negative natural change and flat migration, as deaths outweigh live births. Higher living standards will drive ageing, with a rise in the 65+ population shaping consumer trends and spending. As major cities experience population decline, continued affiliation with Russia will further hinder Belarus's potential as an appealing consumer market in the short to medium term.

Euromonitor's Belarus in 2040: The Future Demographic report analyses factors influencing national consumer expenditure. Consumer lifestyles reports include coverage of: population, urban development, home ownership, household profiles, labour, income, consumer and family expenditure, health, education, eating habits, drinking habits, shopping habits, personal grooming, clothing, leisure habits, savings and investments, media, communication, transport and travel and tourism. Use this report to understand the factors influencing a nation's lifestyle choices.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Consumer Lifestyles market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;

Use five-year forecasts to assess how the market is predicted to develop.

Euromonitor International has over 40 years' experience of publishing market research reports, business reference books and online information systems.
