Abstracts

The drought experienced over the past two years in Uruguay severely impacted the quality of running water, rendering it unsuitable for human consumption due to its high sodium content of 400mg. This affected cities like Montevideo, Canelones, and San Jose, leading to an upsurge in bottled water consumption. The government responded by distributing bottled water in lower-income neighbourhoods. Consequently, bottled water sales surged in volume terms from March to May 2023 and continued to grow th...
