Abstracts

Butter and margarine posted a sluggish performance overall in 2017, with volume sales declining by 2%. This can be attributed to the maturity of the category and the ageing of the population. The category is lacking innovation, while both butter and margarine are widely regarded as products which contribute to weight problems. Strict regulations with regard to health claims make it very difficult for manufacturers to respond to this perception.

Euromonitor International's Butter and Margarine in Germany report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data 2012-2016, allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market - be they new product developments, distribution or pricing issues. Forecasts to 2021 illustrate how the market is set to change.
