## Abstracts

For decades, butter has been eyed suspiciously by the US health and scientific community, with consumers being warned about the dangers inherent in consuming a product containing such high levels of fat and cholesterol. Butter has been blamed for producing a plethora of negative health effects, and for decades its consumption has been linked by nutritionists to a high risk of developing health problems, in particular high cholesterol, which is said to lead to heart disease. This butter doctrine,...

Euromonitor International's Butter and Margarine in USA report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data 2012-2016, allowing you to identify the sectors driving growth.
