## Abstracts

2022 was a challenging year for butter in Tunisia, with a critical volume decline of over 30% due to the continuous shortage of butter caused by the lack of milk production by farmers. Low levels of milk production was caused by a range of factors, including poor weather conditions and the high cost of animal feed. This shortage resulted in price hikes and product scarcity in supermarkets and grocery stores, negatively impacting both consumers and businesses.

Euromonitor International's Butter and Spreads in Tunisia report offers in-depth knowledge of the market at a national level, providing local insight and understanding unavailable elsewhere. In addition to the latest retail sales data 2018-2022, it identifies the leading companies, brands and retail outlets, and assesses the key trends and demographic shifts behind consumer demand and sales growth.
