Abstracts

Canned/preserved food packaging achieved slight unit volume growth in 2011, mainly driven by growth in canned/preserved tomatoes, beans, vegetables and fish/seafood packaging. Canned/preserved food packaging also posted gains over 2011 in fruit and soup, but canned/preserved meat and meat products posted a decline. The metal food can remains the most commonly used type of packaging in canned/preserved food. The main benefits of metal packaging are resistance, protection and convenient storage... Euromonitor International's Canned/Preserved Food Packaging in Czech Republic report offers insight into key trends and developments driving packaging across the category. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.
