Abstracts

Confectionery is facing challenging times in Latin America, with a difficult economic situation, particularly in Brazil, growing consumer health concerns and legislative challenges the main culprits. Nevertheless, the importance of chocolate confectionery over sugar confectionery is increasing in light of it being perceived as more premium and less detrimental to health. This is driven, for example, by smaller pack sizes and improved retail distribution.

Euromonitor International's Confectionery in Latin America global briefing offers an insight into to the size and shape of the Packaged Food (Rolling update) market, highlights buzz topics, emerging geographies, categories and trends and identifies the leading companies and brands. It also offers strategic analysis on driving packaged food industry trends like health and wellness, premiumisation, convenience and value-for-money and how those trends influence factors like new product developments, packaging innovations, retail distribution and retail pricing both historically and into the future.

Product coverage: Baby Food, Baked Goods, Breakfast Cereals, Confectionery, Dairy, Edible Oils, Ice Cream and Frozen Desserts, Processed Fruit and Vegetables, Processed Meat and Seafood, Ready Meals, Rice, Pasta and Noodles, Sauces, Dressings and Condiments, Savoury Snacks, Soup, Spreads, Sweet Biscuits, Snack Bars and Fruit Snacks.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
