Abstracts

Consumer Types can be a powerful tool to help companies better understand and appeal to their target markets. By going beyond typical demographic-based segmentation, such as age or gender, and grouping consumers based on shared traits and preferences, companies can better develop products and marketing campaigns that resonate with key customers.

Euromonitor's Consumer Types in the UK report analyses factors influencing national consumer expenditure. Consumer lifestyles reports include coverage of: population, urban development, home ownership, household profiles, labour, income, consumer and family expenditure, health, education, eating habits, drinking habits, shopping habits, personal grooming, clothing, leisure habits, savings and investments, media, communication, transport and travel and tourism. Use this report to understand the factors influencing a nation's lifestyle choices.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
