## Abstracts

In the midst of the global downturn, with consumers facing job losses and rising prices, which purchasing criteria are they prioritising and how have their shopping habits changed? This new global report analyses the results of Euromonitor's 2011 Annual Study of global consumers, which probes the motivations, perceptions and habits of around 16,000 respondents in the US, UK, France, Germany, Japan, China, Brazil and India; and examines the implications of these findings for marketers.

Strategy Briefings offer unique insight into emerging trends world-wide. Aimed squarely at strategists and planners, they draw on Euromonitor International's vast information resources to give top line insight across markets and within consumer segments. Written by some of our most experienced analysts, they are designed as provocations for senior management to use in their own forum, allowing them to stand back and reflect on the behaviour and motivation driving global markets today and tomorrow

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.
