Abstracts

The average unit price of contact lens and solutions is rising in 2023, with many manufacturers forced to increase their overall prices following the impact of the war in Ukraine on production, raw material costs, and shipping. In addition, increasing labour costs and the weakening of the Japanese yen are also impacting prices. This scenario is especially impacting players with overseas production as their products must be imported.

Euromonitor International's Contact Lenses and Solutions in Japan report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (2018-2022), allowing you to identify the sectors driving growth.
