Abstracts

After the pandemic resulted in declining sales in China in both 2020 and 2022, the macroeconomic challenges this country was experiencing meant sales continued falling in 2023. With China being the region's biggest market, this was impacting the overall regional performance. India, on the other hand, continued to see dynamic growth, helping to offset the declining Chinese sales. Positive growth is expected throughout the forecast period in Asia Pacific.

Euromonitor International's Dairy Products and Alternatives in Asia Pacific 2024 global briefing provides a comprehensive overview of the Dairy Products and Alternatives market, providing insight on sales and market potential, retail distribution and company and brand shares. Analysis identifies emerging geographies alongside growth opportunities in the most developed, highest value countries. It also offers strategic analysis of the key trends shaping the industry and consumer demand, such as health and wellness, sustainability, the evolution of eating occasions, in addition to ongoing considerations of convenience and value-for-money in the post-pandemic world. Insight into how these trends are shaping demand informs forecasts to 2027, clearly indicating how the market is expected to change.

Product coverage: Baby Food, Dairy, Plant-based Dairy.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
