Abstracts

In 2023, dairy consumption remains high despite the many negative factors that are currently impacting the industry, such as inflation and Kuwaitisation, which has resulted in decreased population. Nonetheless, due to the industry's essential nature, it continues to perform well and will see ongoing growth. Generally, dairy is benefiting from its healthy image, while price subsidies on milk formula and other essential categories remain a major influence on demand.

Euromonitor International's Dairy Products and Alternatives in Kuwait report offers in-depth knowledge of the market at a national level, providing local insight and understanding unavailable elsewhere. In addition to the latest retail sales data 2018-2022, it identifies the leading companies, brands and retail outlets, and assesses the key trends and demographic shifts behind consumer demand and sales growth.
