Abstracts

Middle East and Africa ranks the lowest in terms of internet penetration. However, with the affordability of smartphones and increasing investment in ICT, the region is the fastest growing in terms of internet users. Gulf countries outstand with higher digital connectivity, while Africa faced challenges due to low digital literacy and lack of infrastructure. As digital access becomes pivotal to economic and social progress, mobile is expected to be the driving platform.

Strategy Briefings offer unique insight into emerging trends world-wide. Aimed squarely at strategists and planners, they draw on Euromonitor International's vast information resources to give top line insight across markets and within consumer segments. Written by some of our most experienced analysts, they are designed as provocations for senior management to use in their own forum, allowing them to stand back and reflect on the behaviour and motivation driving global markets today and tomorrow

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
