Abstracts

In 2022, though there was healthy growth in current value sales, constant value sales remained unchanged. The war in Ukraine had a negative impact, with the resultant energy crisis leading to soaring inflation and dampening sales somewhat. That being said, direct selling performed better than non-grocery retailing, as its competitive prices enabled it to maintain value sales. Health and beauty continued to account for most value sales, with sales for other products being negligible.

Euromonitor International's Direct Selling in North Macedonia report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Product coverage: Appliances and Electronics Direct Selling, Drinks and Tobacco Direct Selling, Fashion Direct Selling, Foods Direct Selling, Health and Beauty Direct Selling, Home Products Direct Selling, Other Products Direct Selling.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?
