Abstracts

Global sales of connected major kitchen appliances are predicted to reach 25 million units in 2023, generating huge opportunities for businesses in appliances, retailing and artificial intelligence. Connected kitchens integrating multiple appliances will provide safety protection, efficient planning and a guided cooking experience for consumers. To maintain sales growth, cross-industry efforts still need to address challenges such as a lack of ecosystem services.

Euromonitor International's Disruptive Global Trends and Strategies in Connected Kitchens global briefing offers a comprehensive guide to the retail sales data, allowing you to identify the sectors driving growth. The report also identifies the leading companies/brands and offers strategic analysis of key factors influencing the competitive landscape - be it new product developments, technological innovations, economic/lifestyle influences, distribution or pricing issues. Additionally, trade statistics and producer's shares will answer questions on where appliances are produced and where they are being exported to, how quickly these units are moving, which companies are producing how much, and whether all categories are behaving in the same way. Collectively, this gives a complete view in both marketing and production planning strategies. Forecasts illustrate how the market is set to change.

Product coverage: Major Appliances, Small Appliances.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Consumer Appliances market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;

Use five-year forecasts to assess how the market is predicted to develop.

Euromonitor International has over 40 years' experience of publishing market research reports, business reference books and online information systems.
