## Abstracts

Having surged by three quarters during 2020, e-commerce retail constant value sales (2021 prices) stabilised in 2021 – with growth slowing to low single digits – as COVID-19 restrictions were eased and a growing number of consumers returned to shopping in person. However, the pandemic has served to introduce more local consumers (particularly younger ones) to e-commerce, and now that they have grown comfortable with it, many of them are likely to persist with it.

Euromonitor International's E-Commerce (Goods) in Mexico report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

**Product coverage:** Cross-Border E-Commerce (Goods), E-Commerce (Goods) by Product Category, Mobile E-Commerce (Goods).

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.
