## Abstracts

E-commerce experienced significant growth in 2020 as consumers spent more time at home during lockdown and tried to minimise the number of shopping outlets they visited. Consumers shopped online more often and across more categories, many of which were previously predominantly store based.

Euromonitor International's E-Commerce in Czech Republic report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.
