Abstracts

As the near universal ownership of digital devices and the roll-out of 5G embed the internet ever more deeply into consumers' everyday lives, and confidence in card payments increases, consumers are becoming increasingly familiar with e-commerce in Japan. As such, e-commerce was already seeing healthy growth even prior to the outbreak of COVID-19. However, following the declaration of a state of emergency in April 2020 there was a surge in demand.

Euromonitor International's E-Commerce in Japan report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Product coverage: Cross-border E-Commerce, E-Commerce by Product Category, Mobile E-Commerce.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
