Abstracts

In 2020, e-commerce recorded a massive surge in retail current value sales as a result of a widespread shift in consumer behaviour during the COVID-19 pandemic. During the COVID-19 pandemic, many retail outlets considered non-essential were forced to close their doors for a lengthy period of 2020 as Swiss authorities sought to curb the spread of the virus in the country.

Euromonitor International's E-Commerce in Switzerland report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Product coverage: Cross-border E-Commerce, E-Commerce by Product Category, Mobile E-Commerce.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
