Abstracts

The pandemic accelerated the adoption of e-commerce in Tunisia. The mandated closure of physical stores, reduced travel and rigorous measures to prevent the transmission of the virus changed consumer life overnight and forced retailers to adapt to the changing circumstances in order to survive, and even thrive in some cases. Retailers, such as Founa.com, a major online grocer, experienced a strong uptick in orders in March and April. The retailer's delivery slots were full for a week in advance.

Euromonitor International's E-Commerce in Tunisia report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Product coverage: Cross-border E-Commerce, E-Commerce by Product Category, Mobile E-Commerce.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the E-Commerce market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;

Use five-year forecasts to assess how the market is predicted to develop.
