## Abstracts

The adverse effects of global warming on the environment are precipitating a new approach to urban living - one that seeks to provide liveability and workability in cities while simultaneously preserving the natural environment. The strategy briefing examines how cities are incorporating sustainable and ecological approaches to housing, transport and food production and how businesses should position themselves to achieve success.

Strategy Briefings offer unique insight into emerging trends world-wide. Aimed squarely at strategists and planners, they draw on Euromonitor International's vast information resources to give top line insight across markets and within consumer segments. Written by some of our most experienced analysts, they are designed as provocations for senior management to use in their own forum, allowing them to stand back and reflect on the behaviour and motivation driving global markets today and tomorrow

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.

### Why buy this report

Identify factors driving change now and in the future

Understand motivation

Forward-looking outlook

Briefings and presentation should provoke lively discussion at senior level

Take a step back from micro trends

Get up to date estimates and comment

Euromonitor International has over 40 years' experience of publishing market research reports, business reference books and online information systems.
