Abstracts

Electronics and appliance specialist retailers did not suffer as much as a result of the COVID-19 related restrictions as other non-grocery channels in 2020 and managed to post growth in 2021. Indeed, in the context of the pandemic, with consumers spending more time at home (renovating interiors, furniture, kitchen), demand for domestic appliances increased.

Euromonitor International's Electronics and Appliance Specialist Retailers in Belgium report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
