Abstracts

Lactose-free food is the only type of food tolerance packaged food currently widely available in Colombia. In Colombia, lactose intolerance is the most common problem, and according to trade press, it is estimated that around 40% of Colombian population suffers from it. In addition, consumers who may not be lactose intolerant also view these foods as easier to digest and therefore desirable. As a result, companies in the dairy sector have starting tapping the niche by introducing lactose-free...

Euromonitor International's Food Intolerance in Colombia report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2008-2012, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2017 illustrate how the market is set to change.
