Abstracts

Indians became more aware of food intolerance, its effects and solutions in 2012. The difference between food allergy, which involves the immune system and food intolerance, which involves the digestive system, became clearer. However, Indians still do not treat food intolerance testing as a part of preventive health check-ups. Nestlé India, Raptakos Brett and SRL all continued educating the masses in the media.

Euromonitor International's Food Intolerance in India report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2008-2012, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2017 illustrate how the market is set to change.
