Abstracts

After extremely high growth in 2020 when consumers spent much more time at home and also were less likely to use consumer foodservice outlets in order to avoid crowds and potential COVID-19 infection, food and drink e-commerce continued to see solid double-digit growth in 2021. The strongest growth was seen early in the year when a new wave of COVID-19 hit Denmark and consumers spent more time cooking and eating at home.

Euromonitor International's Food and Drink E-Commerce in Denmark report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Food and Drink E-Commerce market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;

Use five-year forecasts to assess how the market is predicted to develop.
