Abstracts

The retail value sales of food and drink e-commerce in Egypt more than trebled during 2020 as COVID-19 and its subsequent movement restrictions led consumers to turn to the internet to buy food and drink. Many feared that the pandemic would lead to breakdown of supply chains, so those who could afford to stocked up on staple products (like rice and pasta). E-commerce is the perfect channel for this type of purchasing, as orders are delivered to the consumer's door, making it safe and convenient.

Euromonitor International's Food and Drink E-Commerce in Egypt report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Food and Drink E-Commerce market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;

Use five-year forecasts to assess how the market is predicted to develop.
